

Security Audit Summary (S1–S21 Complete, `docs/SECURITY_REVIEW.md`):

Category	Status	Mitigation Implemented
S1–S5	Fixed	Finite float range validation on RA/Dec, display name sanitization, bounded collision loop.
S6–S8	Fixed	SSE rate limiting, exception message scrubbing (`_public_error`), Netlify S8 proxy HMAC signing.
S13–S14	Fixed	SHA-256 hashed lock file (`requirements.lock`), unprivileged non-root containers (`uid 10001`).
S15–S21	Fixed	Salted client hashes for votes, bounded job queue pool, IVOA cone query bounds, regex sanitization.
